Vendor and License Management

Why Not Get More for Less!

• License Management

When you choose SCVData to manage your software licenses, you will never have to worry about forgetting your product licenses, and you'll be able to feel confident that your business meets license requirement standards. We specialize in knowing the rules and regulations can audit your environment to provide recommendations on licensing, determine what upgrades you are eligible for, and help you make the best decision while managing your software.

• Reliable Vendor Management

Whether you've had bad experiences with past vendors, or are looking for alternatives, SCVData has developed strategic alliances with many vendors such as Dell and HP. We know the good vendors from the bad ones and will be able to help you choose vendors that will provide you with the best service and customer support.

• No Contracts

No one wants to get locked into a long term contract with a vendor. Flexibility is key. Because we deal directly with many vendors on a daily basis, we are able to provide products to you without requiring you to sign up for any contracts!

• Best Value

Because of the volume of work that we produce with our vendors, we are able to offer lower prices than typical retail prices. This ensures that you will receive quality products at a lower price!
